30/28-27(1)

"[redacted] the country of Poverty and Unemployment," commands Pandit Jawaharlal Nehru, our Prime Minister

People's Agricultural Army

(UNDER FORMATION)

will bring Prosperity and Plenty

"Love not sleep, lest thou come to poverty; open thine eyes, and thou shalt be satisfied with bread."
—King Solomon's Proverbs 20.13.

General K. M. Cariappa says:-

"I had always regarded the Army as a great social force in the country.

A soldier's complete lack of communalism, his loyalty to the Government of the day put in power by the people, his respect for religion as a personal factor and not for use for collective gains, his desire to work more and talk less, his spirit of comradeship, self-help, humanitarian work to people in distress, regardless of caste, creed and class, are all splendid examples, which if followed by our people as a whole, would not fail to make our country a powerful, plentiful, prosperous and so a peaceful one."

It is of vital importance to the security of the country, that every man and every woman should regard himself or herself as a soldier of the land. Four important factors went to make up the country's strength, namely,

(a) a people with high morale;
(b) economic stability in the country;
(c) industrial self-sufficiency and
(d) a virile people.

Long live Cariappa

May God grant that the PEOPLE'S AGRICULTURAL ARMY will fulfil the desire of our first Great General and make it a mighty force as the first line of defence of our great land—India.

This Army is envisaged to provide employment for Graduates, Agriculturists, Economists, Engineers, Accountants, Medical men and workers, as employed in the regular Defence Army. A mighty organization to eradicate POVERTY AND UNEMPLOYMENT and to cultivate every inch of ground that is available to grow all the food we need in the country.

A number of both men and women are required to propagate the gospel of making our country Plentiful and Prosperous, and to redeem our rising generation from POVERTY AND UNEMPLOYMENT.

Unemployed, join the Army to-day and spend your time usefully in this National Development and construction of human lives. We are sure to get the help required from Government, if you will only interest yourself in this mighty organization.

5 acres of land offered by Mr. P. M. Mani in Thrikakara near Edapally must be brought into use in the quickest time possible.

"Little drops of water
Little grains of sand
make the mighty ocean
and the pleasant land."
